

# Sixth Form Mobile Device Scheme

We understand that having the right ICT tools to help you learn and achieve your best are essential.

This scheme allows you to buy your own mobile device from the college catalogue and pay for it each month, spreading the cost in an affordable way

To help you get the most from the device, the scheme also includes full insurance so that you can take it with you to your lessons without having to worry about accidents

Software won't be an issue either. You get full remote access to the network, allowing you to use your programs and files as if you were in college

TICK
