

# Autumn Term in Reception

We've enjoyed listening to and writing lots of stories. The story 'Shhh' about a sleeping giant has become a class favourite. Here the girls are creating a story map for 'Handa's Surprise'.

The children have worked with numbers from 1-10. We have worked on the concepts 'one more', 'one less' and 'altogether'. We have worked with number lines to 20 and can fill in missing numbers. As you can see, we enhance our learning through use of maths equipment

We listened very carefully as Emma told us all about fire safety around the fire pit. We really enjoyed cooking and eating pancakes. A highlight of our gardening sessions was planting an apple tree which we intend to observe throughout our time at school.

# Autumn Term in Reception

In mathematics, the children have been problem solving. Here we have a Christmas party in the classroom. The children were faced with problems such as how many more sandwiches do we need?

In November, we remembered our brave soldiers. The children made poppy artwork using sponge applicators. This helped us develop our fine motor control.

Look who came to our Christmas party!
