

Here is a quick summary of what the year 3 children have been learning over the autumn term.

### Numeracy

I have been learning my 8 x table and it is really fun. We have also been subtracting 100,s and it is amazing, I learned something new this lesson. I found out that you don't have to add 100 to the first number you can just add the smaller number to 100 and this really helped me.

I liked learning about the 3D shapes. I liked learning the Number bonds to 10 and I liked drawing on isometric paper because we learned how to draw 3D cubes accurately. I really enjoyed the problems solving work where I have to make a bigger number than 9 and I could only use the numbers 1 and 2. It was hard at first but then it got easier the more I tried.

By Rose

### Literacy

I liked how to trap a troll because you got to draw and write. I liked the Korky Paul biography research. We have learned how to punctuate speech correctly using the Hairy Fairy because it was fun to write about. I have learned how to hold a sentence because it helps you to remember about things like the hairy fairy sat in the comfortable chair all day and night. Beautiful bird is a book we used to write adjectives, like orange claws. I liked Winnie Under the Sea because you had to write a lot of sentences and use things like speech, I did really well at this. I also really enjoyed learning how to reverse verbs because I was learning something new and I can use it in my writing.

By Michael

### Science

I liked when we were doing all about food. My favourite question was, why is chocolate bad for dogs? I enjoyed creating a graph to show how much sugar someone has in a day and I decided that the person was having too much.

I enjoyed learning about the different bones and comparing the similarities and differences between our skeletons and animal skeletons. I also like earning about the different muscles in the body and doing different actions to see what muscles we were using.

By Lexi

## Humanities

I have enjoyed learning about the local area. It was very, very fun. I have loved identifying the jobs and using the maps to find the different countries within the UK. We looked at how to be responsible in our local area and not litter. I enjoyed learning about the traditions of Halloween and why we celebrate Bonfire Night.

We learned about a skeleton that was from the Bronze Age and I created a power point to share lots of information about this time.

Although we have thoroughly enjoyed last term, the staff and children in Year 3 are looking forward to the spring term and discovering many new things. In numeracy we will be moving onto look at the 3x and the 6x tables, we will revisit place value from last term and explore different ways of using fractions. In literacy we have the exciting topic of Greek Myths and legends where the children will be introduced to many new exciting characters and explore the writing styles of the ancient Greeks. We will be finding out how attractive magnets are in science and how plant Earth can be a volatile place when it comes to volcanoes and earthquakes. In ICT we will be looking at how to combine text and graphics

and explore the different Christian symbols in RE. Overall the spring term is bursting full with exciting and engaging topics and we cannot wait to start in January!
