

Year 3 Spring 1 2018

We are enjoying going swimming. The activities are fun especially the team games to collect sinkers and floaters. It is fun because you get wet!

Science lessons have been all about magnets. We investigated which magnet was the strongest. We also used our computer time to research the uses of magnets.

In Maths it has been fun learning about fractions and applying our knowledge of times tables. We enjoyed investigating fractions and creating robots. We have added and subtracted fractions with the same denominator.

Literacy lessons have been based around Greek myths – heroes and hideous beasts. We have enjoyed writing stories.

In Geography it was fun learning about volcanoes. We created pictures in Art.

We love Y3.

Coming up in Spring 2

- Roald Dahl
- Number and measures

- Ancient Egypt
- Rocks
- The Easter Story
