

In Year 1 this term, we have been exploring what the 3 little pigs should have built their houses out of in Science.

"We made the 3 little pigs' house" by "sticking materials on the houses we drew."

The children explained that, "We were trying to make a house that can stand up to the weather."

"We used something that looks like paper so it when it rains it doesn't get soggy."

Next term, we will be looking at the changing seasons in Science and asking the question "Would the Beatles have made won the X Factor?" in History!
