

FULL TIME EDUCATION

THE ACADEMIC PATHWAY AT 16

Lots of young people choose to do A Levels post 16 and these are excellent general qualifications that are valued by employers and also universities. A Levels offer a great route to degree level study.

VOCATIONAL QUALIFICATIONS AT 16

Choosing a vocational qualification can be a good option if you have a job sector in mind for the future or if you would like to gain employability skills linked to a particular type of work. This could be through a 'vocational subject' related to a broad employment area (such as business, IT, health and social care) or through a 'vocational course' that leads to specific jobs (such as hairdressing, accounting, professional cookery or plumbing).
