### Notes

**NCC - Local Authority (Northumberland) Average**

**Quintile** - For your attainment data a quintile has been calculated for each subject, where the results for all schools in Northumberland in each subject are taken and ranked and then divided into 5 equal sized groups, giving each school a score from 1 to 5 (coloured as key below), with 1 being the top 20% of schools in Northumberland and 5 being the bottom 20%. This is useful

Key	1	2	3	4	5
-----	---	---	---	---	---

### Notes

**NCC** - Local Authority (Northumberland) Average

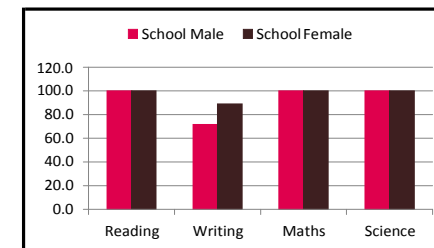

**Quintile** - For your attainment data a quintile has been calculated for each group, where the results for all schools in Northumberland in each group are taken and ranked and then divided into 5 equal sized groups, giving each school a score from 1 to 5 (coloured as key to the left), with 1 being the top 20% of schools in Northumberland and 5 being the bottom 20%. This is useful to see where your school sits within the context of other Northumberland schools in each subject area, however please also look at this in context with your cohort size for the relevant year group (i.e. A very small cohort size may reduce the usefulness of this data).

**Data Sources** - Prediction data taken from 2016 predictions provided by schools in February 2016. End of year data taken from school end of year statutory data submission.
