

Gardening: Green Group Post 16

Students in post 16 have been working to harvest a range of fruit and vegetables from our school garden this term. Students are working towards the Level 3, Royal Horticulture Society Award.

Students have been learning to use a number of tools in our school garden including, loppers, secateurs, a spade, rotator and other everyday tools.

Students are now starting to plant trees and bulbs ready for spring. We are also working on a number of willow, and wooden Christmas gifts to sell at our School Fair.
