

Our Amazing Log Frame Climber

We're delighted to announce, that we've added a brilliant log climbing frame to our early years outdoor learning environment.

The log climber will help build our younger children's climbing confidence and prepare them for more advanced climbing equipment which they will face as they progress through school.

There is also no obvious way for the children to enter the challenge, making it open-ended and more exciting for our children.

Children will develop their upper and lower body strength, flexibility, balance, hand to eye coordination, core stability, hand strength and gross motor skills.

The climbing challenge is a group one, encouraging cooperation, teamwork, competition and imaginative play.

There is also plenty of space underneath the climber for den-making, relaxation and quiet reading.

We worked with Pentagon Play on this project and highly recommend them to any school looking to develop their outdoor play space.
