

19<sup>th</sup> March 2018

Dear Mrs Turner,

I am writing to thank you for letting me spend the morning at the academy. The Science activities were great, I really enjoyed all of them. I especially liked creating the turf head and making a gold coin.

To create a gold coin, we had to get a bronze coin, put it in a pot with Liquid zinc. After that we put the Bunsen burner onto blue flames held the gold coin with a metal thing called a tong and put it on very lightly and waited until it had a trace of gold. Once we had done that we needed to dip it in cold water, and then it looked like gold coin.

I had a wonderful time and all the activities were so fascinating I was really into it. I think your science lab (Mega Lab) is excellent as you've got lots of equipment and lots of space. The six formers played a fantastic role and they were really supportive and were easy to talk to and have a laugh with. They really know a lot about science and were really helpful. I think it is great having all that room for science experiments such as Bunsen burner and lots more.

I want to thank you for inviting Year six to Bushey academy. I really enjoyed it at Bushey Academy. This outstanding school trip has been by far the best I have been on in year six. Once again I just wanted to say how amazing it is. I hope we can visit again soon.

Your sincerely
