After a successful transition from year 6 to year 7, students are thriving at Northfield School in an outstanding year group. 100% of year 7 students have achieved at least two sub levels progress in 5 or more subjects. 82.2% of students have achieved or exceeded their end of year target. Year 7 students have recorded over 5000 achievement points during the year and they have the highest number of students in the success club within the school.

The year council students reflect upon what has been an excellent year.

‘This has been my first year at Northfield, personally it has been quite scary but as the school year has progressed it seems to have got better and better. It was a huge step from primary school but I feel as it has been the best change so far... I love Northfield and everything about it’. Alisha

‘From the beginning of the year we were invited to join a club called success club. Success club has been such a motivating achievement for me. I have no behaviour points, good attendance and lots of achievement points. Not just that, but if you stay in success club you are invited to so many activities. What I really like about the activities is that it gives me a goal to achieve and tells me how good I’ve been throughout the year!’ Tegan
‘I am in success club and the things that have motivated me to stay in success club are the school trips. School trips motivate me because if I am not in success club I would not have the pleasure of going on the school trips. Also the effective learner project has helped me to stay in success club because if I wasn’t an effective learner or I didn’t know how to be one, I wouldn’t be in the success club’ Holly

‘In Morning Form Time we did an effective learner week which was about how we could be an effective learner. We did a big poster with different ways of being an effective learner. This had an effect in my lessons because it made me work harder and listen more’ Ella

‘We did an effective learner agreement. This is where in our tutor groups we agreed on how to behave and perform in lessons including the 5 R’s: Resilient, Reasoning, Respect, Responsible & Reflect. Also during morning form time we have been working through revision booklets and collective worship. The revision booklet helped us to use different revision techniques like mind maps’ Thomas

‘I thought that the revision guide really helped me get good scores on my tests. It had things on for every type of learner so nobody was left out. I am a visual learner so I learn from watching things. This year I have achieved lots of things. I have had lots of fun learning about how to make new things eg how to make a bouncy ball’ Abbey

‘I enjoy my time at Northfield and I like the teachers. Extra curricular activities I go to are basketball, table tennis and sometimes cricket. I’ve enjoyed the year at Northfield and I can’t wait to see what comes next year!’ Lee

‘In Morning Form time we have booklets which help to record our levels. I have gone up at least two sub-levels in each subject’ Lloyd
‘Student Council has had many exciting projects, benefiting our local area to the other side of the equator. Our first project was the food bank project. This was for all of the people who are struggling to put food on the table every night. We managed to gather a massive 750 (aprox) items of food, smashing our 250 item target. Our current project is working with children in Tanzania with a charity called ‘Tap’. Cameron

‘Not long ago we went to Kingswood for 3 days and we did loads of fun activities such as the zipwire, 3g swing, laser tag, team challenge and many more’ Becky

‘Kingswood was amazing, I was the Robin Hood of archery!’ Declan

‘I was one of the students who had a fabulous time at Kingswood. Year 7 has been great for me. I have had lots of fun and have flown above my targets in many lessons. I am really excited to year 8 and any year 6’s that are coming up in September will thoroughly enjoy their 5 years here’
